MEHWER® Processing

Field Selection → Harvesting → Receiving → Cleaning & Sorting → Low-Temperature Drying → Cooling → Milling → Sieving → Metal Detection → QC Testing → Packing → Controlled Storage

Drying is carried out at controlled temperatures to minimize unnecessary loss of aroma and volatile constituents. Milling is managed to limit excessive heat generation and preserve product quality.

Bulk & Private-Label Supply

Available in **1 kg, 5 kg, 10 kg, 20 kg and 25 kg** export-oriented packs, with retail and private-label formats available for qualified customers.
